

1. Homepage

Site loads with a modal for login information.

2. Monzo redirect

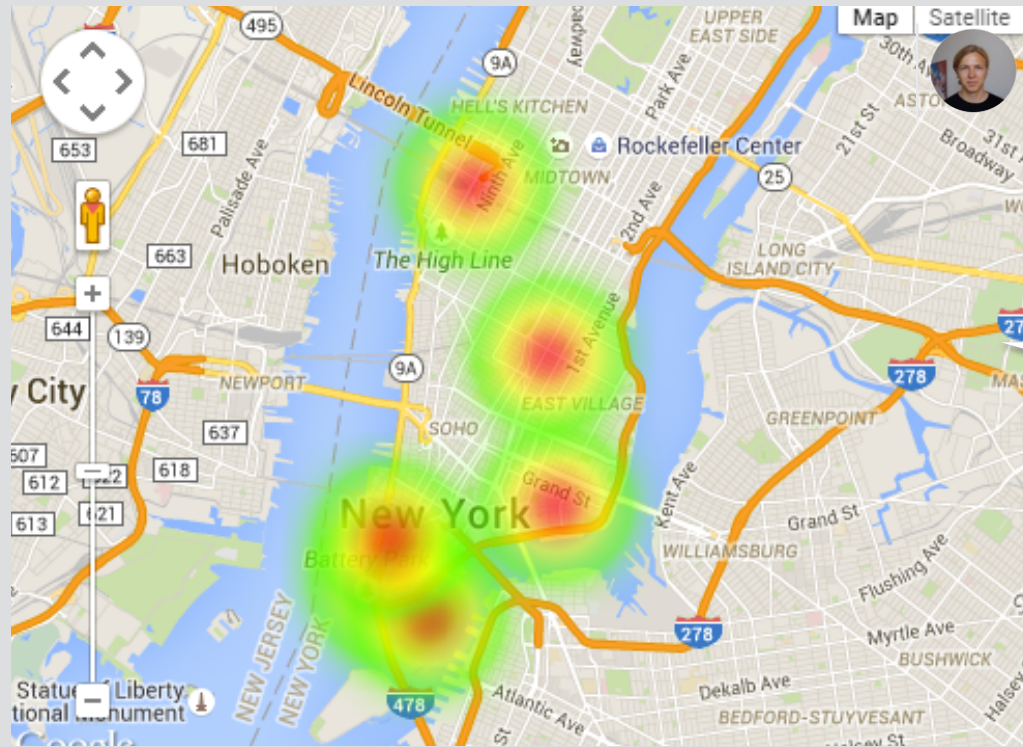

The user is redirected to monzo's application to authorise the application

app asks user for
login information
to grant
authorisation

3. Site redirect

User is then redirected back to the app to show the heat map

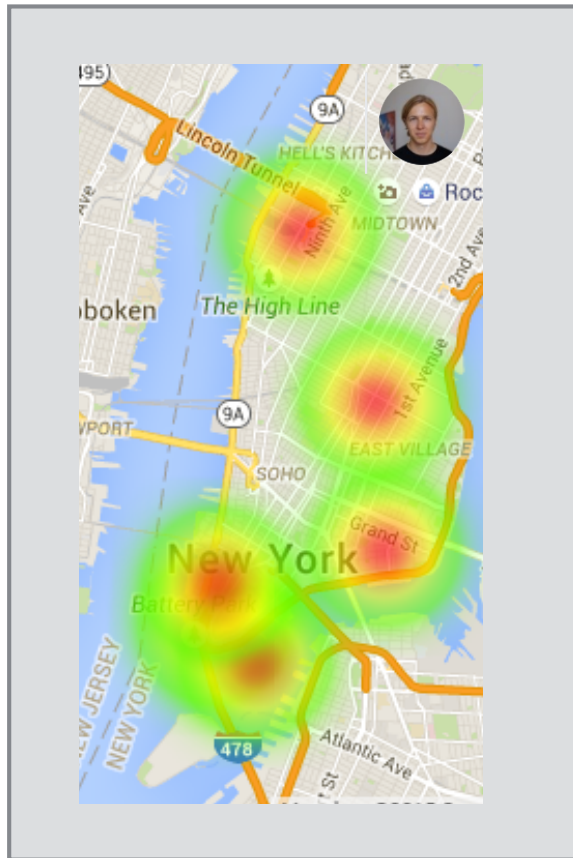

User profile picture appears here (if logged in monzo). Click here to log out and potentially change view options

heat maps will appear where most money has been spent. Can also look at the data by number of transactions and split by genre

4. Mobile friendly

As monzo is a mobile app it would be good to make this web page mobile first.

5. Additional info

As a bonus it would be nice to have frequently visited spots - if clicked can see all transactions from that location
